

Excelling in Full-Cycle Software Development with HeartCore

HIGHLIGHTS

01

HeartCore Development Proficiency

Luvina's prowess in developing software solutions with HeartCore.

02

Full-Cycle Software Development

From design to deployment, Luvina handles every aspect of the development process.

03

Proactive and Flexible Work Reporting

Luvina's commitment to effective communication and adaptability.

OVERVIEW

Luvina embarked on a project from one of our strategic clients, who recognized Luvina's exceptional software development capabilities using Heartcore. In just over three months, the project was not only successful but also exceeded end-user expectations.

Heartcore, a powerful CMS solution, posed no challenges due to Luvina's in-depth understanding gained through previous maintenance projects and internal training.

- **Country:** Japan
- **Service:** Software Development
- **Technology:** Heartcore
- **Scale:** 2MM
- **Duration:** 3 and a half months
- **Collaboration Model:** Offshore Development Center

ABOUT CLIENT

Our client is the number one CMS provider in Japan, engaged with multiple offshore partners, including Luvina and Indian partners.

After noticing Luvina's capabilities through several projects, the client grew trust in our expertise. Notably, the client appreciated our deep understanding of Heartcore, leading to the trust placed in Luvina for this software development project.

CASE STUDY

REQUIREMENTS

- **Expertise in HeartCore Development:** Proficiency in developing software solutions with Heartcore was a key requirement.
- **Full-Cycle Development Capability:** The client sought a team capable of handling every phase of software development, from design and coding to testing and delivery.
- **Frequent, Proactive, and Flexible Communication:** Effective and adaptable communication was vital.

REQUIREMENTS

- The project, following an Agile project management model, demanded high levels of proactivity and adaptability from the executing team.
- This was the first time Luvina had the chance to execute a full-cycle development project with Heartcore.

SOLUTIONS

To overcome these challenges, Luvina adopted a strategic approach based on:

Effective Workflow and Reporting

2

1

Luvina has refined our work processes through years of IT Outsourcing experience, ensuring high-quality and timely project delivery.

Adhering to the process, the project was completed on schedule, resulting in the client's satisfaction with our workflow.

Expert Human Resources

Luvina leveraged our team members who had a thorough knowledge of Heartcore, despite not having prior Heartcore development experience. By using these skilled resources, we achieved the project's objectives.

ACHIEVEMENTS

Luvina's core values, rooted in a commitment to quality, shone brightly in this Heartcore software development project. The project was a success, meeting the client's expectations and needs. Luvina is ready to take on more Heartcore-related projects in the future.

This success story showcases Luvina's capacity to take on challenges, acquire new skills, and achieve outstanding outcomes in software development, particularly with Heartcore.
